Sources & actors (Justice and Crime Coverage)

AUTHOR
Franziska Oehmer

KEYWORDS
judicial reporting, court reporting, representativity

BRIEF DESCRIPTION
These variables are used to determine whose views and activities are covered in the reporting on justice. A distinction is made between the variable „actors“, which is used to measure the description of acting persons, and the variable „source“, that captures which persons have a direct or indirect quote.

FIELD OF APPLICATION/THEORETICAL FOUNDATION
The variable serves - among other variables – as an indicator of the representativeness of judicial reporting.

EXAMPLE STUDIES
Haney & Greene (2004); Oehmer (work in progress)

INFORMATION ON HANEY & GREENE (2004)
Authors: Craig Haney, Susan Greene
Research interest: The study evaluates aspects of newspaper reporting about death penalty cases and capital defendants.
Object of analysis: “representative sample of local, mainstream (i.e., non-“tabloid”) newspaper coverage” (134)
Codebook: not available

INFORMATION ON OEHMER (WORK IN PROGRESS)
Research interest: The research interest of the study focuses on three sets of questions concerning 1) the selection and representativeness of court reporting, 2) the information function of court reporting and 3) the presentation of court reporting.
Object of analysis: court coverage in Swiss newspapers (Tagesanzeiger, NZZ, Neue Luzerner Zeitung, Südostschweiz, Blick, Gratiszeitung, 20Minuten)
Time frame of analysis: January 2007 – December 2017
Codebook: available

laypersons purporting to be knowledgeable about him or his crime(s) were specifically quoted or cited. For example: After allegedly stealing Shockley’s 1990 Buick station wagon and items from Shockley’s Lodi home, Hensley went to the Oasis bar on the outskirts of Stockton and picked up a 32-year-old prostitute, police said. ("Killing Suspect Caught," 1992)“ (136)

<td>Actors in most covered court case in article</td>
<td><strong>Actors of the trial</strong> Only actors of the (dominant) trial described in the article are coded - i.e. actors involved in other processes are not considered here. Only those actors are coded who are described as actively acting. Simple statements such as „the verdict of the court“ or „in the motion of the lawyers can be read that“ does not qualify as actors. Decisive for the assignment to an actor is the role in the respective process: If, for example, a police officer is accused of abuse of authority, he is coded as the accused, not as an actor of the police.</td>
<td>• Prosecution Defense • Opfer • Angehörige der Opfer • Angeklagte(r) • Angehörige des/r Angeklagten • Akteure der Staatsanwaltschaft • Anwälte/Verteidiger • Richter/ Spruchkörper • Gericht allgemein • Akteure der Polizei • Zeugen • Gutachter • Sonstiges</td>
